# EUROPA Documentation

This page provides in-depth documentation on understanding and using EUROPA. If you don't know where to start, or just want a quick overview of how to use EUROPA, take a look at the [EUROPA Quick Start](#). You can also find an overview of the EUROPA framework and philosophy at [Europa Background](#).

## Architecture

- [Overview](#)
- Propagation Services
- Plan Database Services
- Modeling Services
- Problem Solving Services
- Ancillary Modules

## EUROPA Components

- NDDL:
  - ♦ [NDDL Language Reference](#)
  - ♦ [NDDL CheatSheet](#)
  - ♦ [Complete NDDL Grammar](#)
  - ♦ [NDDL Parser/Compiler](#)
- Constraints:
  - ♦ [Constraint Library Reference](#)
  - ♦ [Adding a Constraint](#)
- Resources:
  - ♦ [How to Use and Configure Resources](#)
  - ♦ [Notes on Using Resource Search Operators](#)
  - ♦ [Example: Faking a State Resource](#)
- Solver:
  - ♦ [Built-in Solver Description](#)
  - ♦ [Built-in Solver Configuration](#)
  - ♦ [Extending the built-in Solver](#)
  - ♦ [Building your own Solver](#)
- API
  - ♦ There are currently 2 classes that provide access to EUROPA as an engine. See this [note](#) on their differences and plans to only expose PSEngine to EUROPA clients, eventually.
    - ◇ [PSEngine](#) : Client API. This interface is also available in Java (we use [SWIG](#) to do the mapping automatically).
    - ◇ [EuropaEngine](#) : Gives access to the internal interfaces for the EUROPA modules.

- ♦ Doxygen documentation for all the EUROPA classes can be found [here](#).
- Listener
  - ♦ Adding a Listener
- [Calling your custom C++ code from Java](#)

## Development Tools

- [How to embed EUROPA in an application](#)
- [makeproject](#): Automatically create all the pieces for a new project.
- High-level visualization and debugging:
  - ♦ [PSDesktop](#): Java app to drive (and visualize) EUROPA interactively.
  - ♦ PlanWorks: Java app to visualize plan details over time.
    - ◊ [PlanWorks Tutorial](#)
    - ◊ [PlanWorks.cfg Reference](#)
- Low-level debugging:
  - ♦ [Debug Output Management](#)
  - ♦ Timelines
  - ♦ The Token Network
  - ♦ The Constraint Network
  - ♦ Metric Resources
  - ♦ Common Debugging Scenarios

## Miscellaneous

- [Glossary](#)
- [References](#)
- [EUROPA Publications](#)
